

WebLayers, Inc. Company Overview

About WebLayers

WebLayers automates SOA governance with the industry's only independent, cross-platform policy management solution. Based on the industry's largest collection of pre-built policies, WebLayers' architecturally superior products speed governance implementation and enforcement from design-time to run-time.

Company

WebLayers delivers a Policy Management solution to automate SOA Governance.

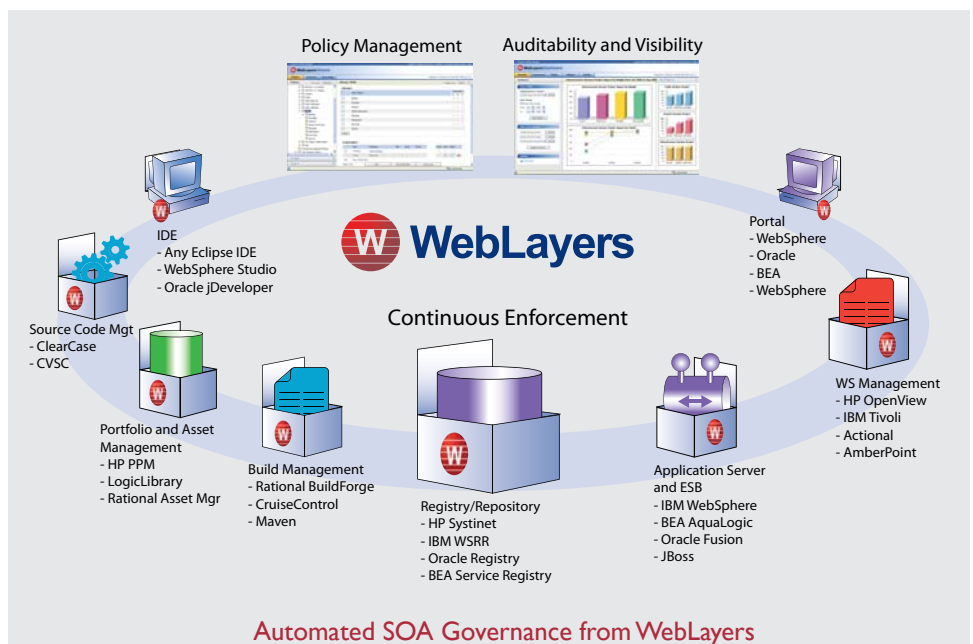

We enable large enterprises to ensure the success of their SOA initiatives by automating the enforcement of business, technical and architectural policies across all of their systems and processes at any stage in the lifecycle.

WebLayers has developed its patent-pending technology together with its design partners and leading customers in both Fortune 500 companies and government agencies. We have been deeply involved in establishing enterprise governance policies for these customers and have codified those best practices into the largest set of policy libraries in the industry.

Product

WebLayers flagship product is WebLayers Center™, an enterprise application that allows organizations to define, enforce and audit policies across the enterprise. Key capabilities include:

- Jump start your SOA initiative with pre-built Policy Libraries
- Define, manage and share policies across the enterprise
- Continuous enforcement across the various infrastructure supporting the SOA lifecycle
- Coverage for all artifacts and assets from design to source code to services
- Enterprise visibility and auditing

“SOA governance isn't optional — it's imperative. Without it, return on investment will be low and every SOA project out of pilot phase will be at risk.”

- Gartner

“With WebLayers' broad support across the IBM product family, enterprises now have a comprehensive solution to govern and measure SOA initiatives.”

- Sandy Carter, IBM

VP SOA & WebSphere

Value Proposition

Our customers have experienced a ROI of under 4 months and savings in excess of \$1.4M in the first year of deployment. Customers use WebLayers' products to:

Save Time and Money

- Reduce manual effort of enforcing governance
- Rapid deployment using pre-built policies
- Eliminate costly rework by identifying issues earlier in the lifecycle
- Improve engineering productivity with continuous enforcement

Mitigate Risk

- Complete transparency and control
- Ensure and measure SOA promise of reuse and flexibility

Differentiation

WebLayers pioneered the concept of Automated SOA Governance and has a patent-pending solution that is differentiated from all other point solutions.

Automated SOA Governance

- Automated policy management – dynamic policy association and classification; strong federation
- Automated enforcement – write once, enforce everywhere

Continuous Enforcement

- Only cross-platform, vendor-neutral solution to span entire SOA lifecycle
- Event-based, not process-based

Largest Policy Library

- Largest collection of pre-built governance policies provide rapid implementation and accelerate success

Alliances

WebLayers has formed key strategic partnerships with leading technology providers and services organizations. Our partnerships provide the necessary tools and support to help our clients install, integrate, customize, and optimize their SOA operations.

We maintain technical and co-selling partnerships with platform vendors including IBM, Oracle and BEA Systems. We also partner with system integrators and resellers, including IBM, Satyam, BoozAllenHamilton, Northrop Grumman and SAIC.

Customers

Representative customers include Thomson Financial, Credit Suisse, GE Money, and U.S. Department of Defense (DISA).

Industry Leadership

WebLayers is the founder and coordinator of The SOA Forum, an exclusive community of over a 1,000 IT executives from Fortune 500 and Federal Government agencies including AT&T, Merrill Lynch, Thomson, AIG, Verizon, Fidelity, Boeing, and NASA.
